https://www.tensorflow.org/api_docs/python/tf/compat/v1/nn/conv2d_backprop_filter

Computes the gradients of convolution with respect to the filter.

Function Signatures

```
tf.compat.v1.nn.conv2d_backprop_filter( input, filter_sizes,
out_backprop, strides, padding, use_cudnn_on_gpu=True,
data_format='NHWC', dilations=[1, 1, 1, 1], name=None )
```

Code Examples

```
tf.compat.v1.nn.conv2d_backprop_filter(  
    input,  
    filter_sizes,  
    out_backprop,  
    strides,  
    padding,  
    use_cudnn_on_gpu=True,  
    data_format='NHWC',  
    dilations=[1, 1, 1, 1],  
    name=None  
)
```

```
tf.compat.v1.nn.conv2d_backprop_filter(  
    input,  
    filter_sizes,  
    out_backprop,  
    strides,  
    padding,  
    use_cudnn_on_gpu=True,  
    data_format='NHWC',  
    dilations=[1, 1, 1, 1],  
    name=None  
)
```

Documentation

Computes the gradients of convolution with respect to the filter.

Returns
