https://www.tensorflow.org/api_docs/python/tf/compat/v1/nn/quantized_avg_pool

Produces the average pool of the input tensor for quantized types.

Function Signatures

```
tf.compat.v1.nn.quantized_avg_pool( input: Annotated[Any,
TV_QuantizedAvgPool_T], min_input: Annotated[Any,
_atypes.Float32], max_input: Annotated[Any, _atypes.Float32],
ksize, strides, padding: str, name=None )
```

Code Examples

```
tf.compat.v1.nn.quantized_avg_pool(  
    input: Annotated[Any, TV_QuantizedAvgPool_T],  
    min_input: Annotated[Any, _atypes.Float32],  
    max_input: Annotated[Any, _atypes.Float32],  
    ksize,  
    strides,  
    padding: str,  
    name=None  
)
```

```
tf.compat.v1.nn.quantized_avg_pool(  
    input: Annotated[Any, TV_QuantizedAvgPool_T],  
    min_input: Annotated[Any, _atypes.Float32],  
    max_input: Annotated[Any, _atypes.Float32],  
    ksize,  
    strides,  
    padding: str,  
    name=None  
)
```

Documentation

Produces the average pool of the input tensor for quantized types.

Returns
