https://www.tensorflow.org/api_docs/python/tf/compat/v1/nn/weighted_moments

Returns the frequency-weighted mean and variance of x .

Function Signatures

```
tf.compat.v1.nn.weighted_moments( x, axes, frequency_weights,  
name=None, keep_dims=None, keepdims=None )
```

Code Examples

```
tf.compat.v1.nn.weighted_moments(  
x, axes, frequency_weights, name=None, keep_dims=None,  
keepdims=None  
)
```

```
tf.compat.v1.nn.weighted_moments(  
x, axes, frequency_weights, name=None, keep_dims=None,  
keepdims=None  
)
```

Documentation

Returns the frequency-weighted mean and variance of x.
