tf.compat.v1.saved_model.experimental

Stay organized with collections Save and categorize content based on your preferences.

https://www.tensorflow.org/api_docs/python/tf/compat/v1/saved_model/experimental

Public API for tf._api.v2.saved_model.experimental namespace

Function Signatures

`save(...)`

Documentation

Public API for tf._api.v2.saved_model.experimental namespace

Classes

class TrackableResource: Holds a Tensor which a tf.function can capture.

class VariablePolicy: Enum defining options for variable handling when saving.

Functions

save(...): Exports a tf.Module (and subclasses) obj to SavedModel format.
