

tf.compat.v1.saved_model.get_tensor_from

Stay organized with collections Save and categorize content based on your preferences.

https://www.tensorflow.org/api_docs/python/tf/compat/v1/saved_model/get_tensor_from_tensor_info

*Returns the Tensor or CompositeTensor described by a TensorInfo proto.
(deprecated)*

Function Signatures

```
tf.compat.v1.saved_model.get_tensor_from_tensor_info(  
    tensor_info, graph=None, import_scope=None )
```

Code Examples

```
tf.compat.v1.saved_model.get_tensor_from_tensor_info(  
    tensor_info, graph=None, import_scope=None  
)
```

```
tf.compat.v1.saved_model.get_tensor_from_tensor_info(  
    tensor_info, graph=None, import_scope=None  
)
```

Documentation

Returns the Tensor or CompositeTensor described by a TensorInfo proto.
(deprecated)
