

tf.compat.v1.saved_model.regression_sign

Stay organized with collections Save and categorize content based on your preferences.

https://www.tensorflow.org/api_docs/python/tf/compat/v1/saved_model/regression_signature_def

Creates regression signature from given examples and predictions.

Function Signatures

```
tf.compat.v1.saved_model.regression_signature_def( examples,  
predictions )
```

Code Examples

```
tf.compat.v1.saved_model.regression_signature_def(  
examples, predictions  
)
```

```
tf.compat.v1.saved_model.regression_signature_def(  
examples, predictions  
)
```

Documentation

Creates regression signature from given examples and predictions.

`tf.compat.v1.saved_model.signature_def_utils.regression_signature_def`

This function produces signatures intended for use with the TensorFlow Serving Regress API (`tensorflow_serving/apis/prediction_service.proto`), and so constrains the input and output types to those allowed by TensorFlow Serving.

Returns

`## Raises`
