https://www.tensorflow.org/api_docs/python/tf/compat/v1/saved_model/signature_def_utils

Public API for tf._api.v2.saved_model.signature_def_utils namespace

Function Signatures

```
build_signature_def(...)  
classification_signature_def(...)  
is_valid_signature(...)  
predict_signature_def(...)
```

Documentation

Public API for `tf._api.v2.saved_model.signature_def_utils` namespace

Classes

`class MethodNameUpdater`: Updates the method name(s) of the `SavedModel` stored in the given path.

Functions

`build_signature_def(...)`: Utility function to build a `SignatureDef` protocol buffer.

`classification_signature_def(...)`: Creates classification signature from given examples and predictions.

`is_valid_signature(...)`: Determine whether a `SignatureDef` can be served by TensorFlow Serving.

`predict_signature_def(...)`: Creates prediction signature from given inputs and outputs.

`regression_signature_def(...)`: Creates regression signature from given examples and predictions.
