

UnpackedDualTensor#

https://pytorch.org/docs/stable/generated/torch.autograd.forward_ad.UnpackedDualTensor.html

Description:

Namedtuple returned by `unpack_dual()` containing the primal and tangent components of the dual tensor. See `unpack_dual()` for more details.

Return number of occurrences of value. Return first index of value.

Raises `ValueError` if the value is not present.

Function Signature

```
class torch.autograd.forward_ad.UnpackedDualTensor(primal,
tangent)[source]#
count(value, /)#
index(value, start=0, stop=9223372036854775807, /)#
primal: Tensor#
tangent: Optional[Tensor]#
```

Detailed Documentation

Documentation

Namedtuple returned by `unpack_dual()` containing the primal and tangent components of the dual tensor.

See `unpack_dual()` for more details.

Return number of occurrences of value.

Return first index of value.

Raises `ValueError` if the value is not present.

Alias for field number 0

Alias for field number 1

Namedtuple returned by `unpack_dual()` containing the primal and tangent components of the dual tensor.

See `unpack_dual()` for more details.

Return number of occurrences of value.

Return first index of value.

Raises `ValueError` if the value is not present.
