

torch.autograd.forward_ad.enter_dual_level

https://pytorch.org/docs/stable/generated/torch.autograd.forward_ad.enter_dual_level.html

Description:

Enter a new forward grad level. This level can be used to make and unpack dual Tensors to compute forward gradients. This function also updates the current level that is used by default by the other functions in this API.

Function Signature

```
torch.autograd.forward_ad.enter_dual_level()[source]#
```

Detailed Documentation

Documentation

Enter a new forward grad level.

This level can be used to make and unpack dual Tensors to compute forward gradients.

This function also updates the current level that is used by default by the other functions in this API.

Enter a new forward grad level.

This level can be used to make and unpack dual Tensors to compute forward gradients.

This function also updates the current level that is used by default by the other functions in this API.
