

torch.autograd.forward_ad.exit_dual_level

https://pytorch.org/docs/stable/generated/torch.autograd.forward_ad.exit_dual_level.html

Description:

Exit a forward grad level. This function deletes all the gradients associated with this level. Only deleting the latest entered level is allowed. This function also updates the current level that is used by default by the other functions in this API.

Function Signature

```
torch.autograd.forward_ad.exit_dual_level(*, level=None)  
[source]#
```

Detailed Documentation

Documentation

Exit a forward grad level.

This function deletes all the gradients associated with this level. Only deleting the latest entered level is allowed.

This function also updates the current level that is used by default by the other functions in this API.

Exit a forward grad level.

This function deletes all the gradients associated with this level. Only deleting the latest entered level is allowed.

This function also updates the current level that is used by default by the other functions in this API.
