

torch.autograd.graph.Node.name#

<https://pytorch.org/docs/stable/generated/torch.autograd.graph.Node.name.html>

Function Signature

```
abstract Node.name()[source]#
```

Return type

Returns:

str

Code Examples

```
>>> import torch
>>> a = torch.tensor([0., 0., 0.], requires_grad=True)
>>> b = a.clone()
>>> assert isinstance(b.grad_fn, torch.autograd.graph.Node)
>>> print(b.grad_fn.name())
CloneBackward0
```
