

# torch.cuda.clock\_rate#

[https://pytorch.org/docs/stable/generated/torch.cuda.clock\\_rate.html#torch.c](https://pytorch.org/docs/stable/generated/torch.cuda.clock_rate.html#torch.c)

## Description:

Return the clock speed of the GPU SM in MHz (megahertz) over the past sample period as given by nvidia-smi. device (torch.device or int, optional) – selected device. Returns statistic for the current device, given by current\_device(), if device is None (default). Warning: Each sample period may be between 1 second and 1/6 second, depending on the product being queried.

## Function Signature

---

```
torch.cuda.clock_rate(device=None)[source]#
```

Parameters

Return type

## Returns:

int

# Detailed Documentation
