

torch.cuda.gds.gds_deregister_buffer#

https://pytorch.org/docs/stable/generated/torch.cuda.gds.gds_deregister_buffer.html

Description:

Deregisters a previously registered storage on a CUDA device as a cufile buffer. s (Storage) – Buffer to register.

Function Signature

```
torch.cuda.gds.gds_deregister_buffer(s)[source]#
```

Parameters

Code Examples

```
>>> src = torch.randn(1024, device="cuda")
>>> s = src.untyped_storage()
>>> gds_register_buffer(s)
>>> gds_deregister_buffer(s)
```

Detailed Documentation

Documentation

Deregisters a previously registered storage on a CUDA device as a cufile buffer.

s (Storage) – Buffer to register.

Deregisters a previously registered storage on a CUDA device as a cufile buffer.

s (Storage) – Buffer to register.
