

torch.cuda.get_device_properties#

[https://pytorch.org/docs/stable/generated/torch.cuda.get_device_properties.h](https://pytorch.org/docs/stable/generated/torch.cuda.get_device_properties.html)

Description:

Get the properties of a device. device (torch.device or int or str, optional)
– device for which to return the properties of the device. It uses the current device, given by `current_device()`, if device is `None` (default). the properties of the device `_CudaDeviceProperties`

Function Signature

```
torch.cuda.get_device_properties(device=None)[source]#
```

Parameters

Returns

Return type

Returns:

`_CudaDeviceProperties`

Detailed Documentation

Documentation

Get the properties of a device.

device (torch.device or int or str, optional) – device for which to return the properties of the device. It uses the current device, given by `current_device()`, if device is None (default).

the properties of the device

`_CudaDeviceProperties`

Get the properties of a device.

device (torch.device or int or str, optional) – device for which to return the properties of the device. It uses the current device, given by `current_device()`, if device is None (default).

the properties of the device

`_CudaDeviceProperties`
