

torch.cuda.is_current_stream_capturing

https://pytorch.org/docs/stable/generated/torch.cuda.is_current_stream_capturing.html

Description:

Return True if CUDA graph capture is underway on the current CUDA stream, False otherwise. If a CUDA context does not exist on the current device, returns False without initializing the context.

Function Signature

```
torch.cuda.is_current_stream_capturing()[source]#
```

Return type

Returns:

bool

Detailed Documentation

Documentation

Return True if CUDA graph capture is underway on the current CUDA stream, False otherwise.

If a CUDA context does not exist on the current device, returns False without initializing the context.

Return True if CUDA graph capture is underway on the current CUDA stream, False otherwise.

If a CUDA context does not exist on the current device, returns False without initializing the context.
