

torch.cuda.memory.caching_allocator_delete

https://pytorch.org/docs/stable/generated/torch.cuda.memory.caching_allocator_delete

Description:

Delete memory allocated using the CUDA memory allocator. Memory allocated with `caching_allocator_alloc()` is freed here. The associated device and stream are tracked inside the allocator. `mem_ptr (int)` – memory address to be freed by the allocator. See [Memory management](#) for more details about GPU memory management.

Function Signature

```
torch.cuda.memory.caching_allocator_delete(mem_ptr)[source]#
```

Parameters

Notes & Warnings

NOTE

Note See Memory management for more details about GPU memory management.

Detailed Documentation

Documentation

Delete memory allocated using the CUDA memory allocator.

Memory allocated with `caching_allocator_alloc()`. is freed here. The associated device and stream are tracked inside the allocator.

`mem_ptr (int)` – memory address to be freed by the allocator.

See Memory management for more details about GPU memory management.

Delete memory allocated using the CUDA memory allocator.

Memory allocated with `caching_allocator_alloc()`. is freed here. The associated device and stream are tracked inside the allocator.

`mem_ptr (int)` – memory address to be freed by the allocator.

See Memory management for more details about GPU memory management.
