

torch.cuda.memory.change_current_allo

https://pytorch.org/docs/stable/generated/torch.cuda.memory.change_current_a

Description:

Change the currently used memory allocator to be the one provided. If the current allocator has already been used/initialized, this function will error. allocator (torch.cuda.memory._CUDAAllocator) – allocator to be set as the active one. See Memory management for details on creating and using a custom allocator

Function Signature

```
torch.cuda.memory.change_current_allocator(allocator)  
[source]#
```

Parameters

Notes & Warnings

NOTE

Note See Memory management for details on creating and using a custom allocator

Detailed Documentation

Documentation

Change the currently used memory allocator to be the one provided.

If the current allocator has already been used/initialized, this function will error.

allocator (`torch.cuda.memory._CUDAAllocator`) – allocator to be set as the active one.

See Memory management for details on creating and using a custom allocator

Change the currently used memory allocator to be the one provided.

If the current allocator has already been used/initialized, this function will error.

allocator (`torch.cuda.memory._CUDAAllocator`) – allocator to be set as the active one.
