

torch.cuda.memory.empty_cache#

https://pytorch.org/docs/stable/generated/torch.cuda.memory.empty_cache.html

Description:

Release all unoccupied cached memory currently held by the caching allocator so that those can be used in other GPU application and visible in `nvidia-smi`. `empty_cache()` doesn't increase the amount of GPU memory available for PyTorch. However, it may help reduce fragmentation of GPU memory in certain cases. See [Memory management](#) for more details about GPU memory management.

Function Signature

```
torch.cuda.memory.empty_cache()[source]#
```

Notes & Warnings

NOTE

`empty_cache()` doesn't increase the amount of GPU memory available for PyTorch. However, it may help reduce fragmentation of GPU memory in certain cases. See [Memory management](#) for more details about GPU memory management.

Detailed Documentation

Documentation

Release all unoccupied cached memory currently held by the caching allocator so that those can be used in other GPU application and visible in `nvidia-smi`.

`empty_cache()` doesn't increase the amount of GPU memory available for PyTorch. However, it may help reduce fragmentation of GPU memory in certain cases. See [Memory management](#) for more details about GPU memory management.
