

torch.cuda.memory.get_allocator_backend

https://pytorch.org/docs/stable/generated/torch.cuda.memory.get_allocator_backend.html

Description:

Return a string describing the active allocator backend as set by `PYTORCH_CUDA_ALLOC_CONF`. Currently available backends are `native` (PyTorch's native caching allocator) and `cudaMallocAsync` (CUDA's built-in asynchronous allocator). See [Memory management](#) for details on choosing the allocator backend.

Function Signature

```
torch.cuda.memory.get_allocator_backend()[source]#
```

Return type

Returns:

str

Notes & Warnings

NOTE

Note See Memory management for details on choosing the allocator backend.

Detailed Documentation

Documentation

Return a string describing the active allocator backend as set by `PYTORCH_CUDA_ALLOC_CONF`. Currently available backends are native (PyTorch's native caching allocator) and `cudaMallocAsync` (CUDA's built-in asynchronous allocator).

See Memory management for details on choosing the allocator backend.
