

torch.cuda.memory.get_per_process_memory_fraction

https://pytorch.org/docs/stable/generated/torch.cuda.memory.get_per_process_memory_fraction.html

Description:

Get memory fraction for a process. device (torch.device or int, optional) – selected device. If it is None the default CUDA device is used. memory fraction, in range 0~1. Allowed memory equals total_memory * fraction.

Function Signature

```
torch.cuda.memory.get_per_process_memory_fraction(device=None)[source]#
```

Parameters

Returns

Return type

Returns:

float

Detailed Documentation

Documentation

Get memory fraction for a process.

device (torch.device or int, optional) – selected device. If it is None the default CUDA device is used.

memory fraction, in range 0~1. Allowed memory equals total_memory * fraction.

Get memory fraction for a process.

device (torch.device or int, optional) – selected device. If it is None the default CUDA device is used.

memory fraction, in range 0~1. Allowed memory equals total_memory * fraction.
