

torch.cuda.memory.mem_get_info#

https://pytorch.org/docs/stable/generated/torch.cuda.memory.mem_get_info.html

Description:

Return the global free and total GPU memory for a given device using `cudaMemGetInfo`. `device` (`torch.device` or `int` or `str`, optional) – selected device. Returns statistic for the current device, given by `current_device()`, if `device` is `None` (default) or if the device index is not specified. See [Memory management](#) for more details about GPU memory management.

Function Signature

```
torch.cuda.memory.mem_get_info(device=None)[source]#
```

Parameters

Return type

Returns:

`tuple[int, int]`

Notes & Warnings

NOTE

Note See Memory management for more details about GPU memory management.

Detailed Documentation

Documentation

Return the global free and total GPU memory for a given device using `cudaMemGetInfo`.

`device` (`torch.device` or `int` or `str`, optional) – selected device. Returns statistic for the current device, given by `current_device()`, if `device` is `None` (default) or if the device index is not specified.

See Memory management for more details about GPU memory management.
