

torch.cuda.memory.memory_snapshot#

https://pytorch.org/docs/stable/generated/torch.cuda.memory.memory_snapshot.

Description:

Return a snapshot of the CUDA memory allocator state across all devices. Interpreting the output of this function requires familiarity with the memory allocator internals. See Memory management for more details about GPU memory management.

Function Signature

```
torch.cuda.memory.memory_snapshot(mempool_id=None)[source]#
```

Notes & Warnings

NOTE

Note See Memory management for more details about GPU memory management.

Detailed Documentation

Documentation

Return a snapshot of the CUDA memory allocator state across all devices.

Interpreting the output of this function requires familiarity with the memory allocator internals.

See [Memory management](#) for more details about GPU memory management.
