

# torch.cuda.memory.reset\_accumulated\_

[https://pytorch.org/docs/stable/generated/torch.cuda.memory.reset\\_accumulated\\_](https://pytorch.org/docs/stable/generated/torch.cuda.memory.reset_accumulated_)

## Description:

Reset the “accumulated” (historical) stats tracked by the host memory allocator. See `host_memory_stats()` for details. Accumulated stats correspond to the “allocated” and “freed” keys in each individual stat dict.

## Function Signature

---

```
torch.cuda.memory.reset_accumulated_host_memory_stats()  
[source]#
```

# Detailed Documentation

---

## Documentation

Reset the “accumulated” (historical) stats tracked by the host memory allocator.

See `host_memory_stats()` for details. Accumulated stats correspond to the “allocated” and “freed” keys in each individual stat dict.

Reset the “accumulated” (historical) stats tracked by the host memory allocator.

See `host_memory_stats()` for details. Accumulated stats correspond to the “allocated” and “freed” keys in each individual stat dict.
