

torch.cuda.memory.reset_accumulated_

https://pytorch.org/docs/stable/generated/torch.cuda.memory.reset_accumulated_

Description:

Reset the “accumulated” (historical) stats tracked by the CUDA memory allocator. See `memory_stats()` for details. Accumulated stats correspond to the “allocated” and “freed” keys in each individual stat dict, as well as “num_alloc_retries” and “num_ooms”. `device` (`torch.device` or `int`, optional) – selected device. Returns statistic for the current device, given by `current_device()`, if `device` is `None` (default). See [Memory management](#) for more details about GPU memory management.

Function Signature

```
torch.cuda.memory.reset_accumulated_memory_stats(device=None)  
[source]#
```

Parameters

Notes & Warnings

NOTE

Note See Memory management for more details about GPU memory management.

Detailed Documentation

Documentation

Reset the “accumulated” (historical) stats tracked by the CUDA memory allocator.

See `memory_stats()` for details. Accumulated stats correspond to the “allocated” and “freed” keys in each individual stat dict, as well as “num_alloc_retries” and “num_ooms”.

`device` (`torch.device` or `int`, optional) – selected device. Returns statistic for the current device, given by `current_device()`, if `device` is `None` (default).

See Memory management for more details about GPU memory management.
