

torch.cuda.nvtx.range#

<https://pytorch.org/docs/stable/generated/torch.cuda.nvtx.range.html>

Description:

Context manager / decorator that pushes an NVTX range at the beginning of its scope, and pops it at the end. If extra arguments are given, they are passed as arguments to `msg.format()`. `msg` (str) – message to associate with the range

Function Signature

```
torch.cuda.nvtx.range(msg, *args, **kwargs)[source]#
```

Parameters

Detailed Documentation

Documentation

Context manager / decorator that pushes an NVTX range at the beginning of its scope, and pops it at the end. If extra arguments are given, they are passed as arguments to `msg.format()`.

`msg (str)` – message to associate with the range
