

torch.cuda.power_draw#

https://pytorch.org/docs/stable/generated/torch.cuda.power_draw.html

Description:

over the past sample period as given by nvidia-smi for Fermi or newer fully supported devices. device (torch.device or int, optional) – selected device. Returns statistic for the current device, given by current_device(), if device is None (default). Warning: Each sample period may be between 1 second and 1/6 second, depending on the product being queried.

Function Signature

```
torch.cuda.power_draw(device=None)[source]#
```

Return the average power draw of the GPU sensor in mW (MilliWatts)

Parameters

Return type

Returns:

int
