

torch.cuda.seed#

<https://pytorch.org/docs/stable/generated/torch.cuda.seed.html>

Description:

Set the seed for generating random numbers to a random number for the current GPU. It's safe to call this function if CUDA is not available; in that case, it is silently ignored. If you are working with a multi-GPU model, this function will only initialize the seed on one GPU. To initialize all GPUs, use `seed_all()`.

Function Signature

```
torch.cuda.seed()[source]#
```

Notes & Warnings

WARNING

If you are working with a multi-GPU model, this function will only initialize the seed on one GPU. To initialize all GPUs, use `seed_all()`.

Detailed Documentation

Documentation

Set the seed for generating random numbers to a random number for the current GPU.

It's safe to call this function if CUDA is not available; in that case, it is silently ignored.

If you are working with a multi-GPU model, this function will only initialize the seed on one GPU. To initialize all GPUs, use `seed_all()`.
