

torch.cuda.set_sync_debug_mode#

https://pytorch.org/docs/stable/generated/torch.cuda.set_sync_debug_mode.html

Description:

Set the debug mode for cuda synchronizing operations. `debug_mode` (str or int) – if “default” or 0, don’t error or warn on synchronizing operations, if “warn” or 1, warn on synchronizing operations, if “error” or 2, error out synchronizing operations. This is an experimental feature, and not all synchronizing operations will trigger warning or error. In particular, operations in `torch.distributed` and `torch.sparse` namespaces are not covered yet.

Function Signature

```
torch.cuda.set_sync_debug_mode(debug_mode)[source]#
```

Parameters

Notes & Warnings

WARNING

Warning This is an experimental feature, and not all synchronizing operations will trigger warning or error. In particular, operations in `torch.distributed` and `torch.sparse` namespaces are not covered yet.

Detailed Documentation

Documentation

Set the debug mode for cuda synchronizing operations.

`debug_mode` (str or int) – if “default” or 0, don’t error or warn on synchronizing operations, if “warn” or 1, warn on synchronizing operations, if “error” or 2, error out synchronizing operations.

This is an experimental feature, and not all synchronizing operations will trigger warning or error. In particular, operations in `torch.distributed` and `torch.sparse` namespaces are not covered yet.
