

torch.jit.wait#

<https://pytorch.org/docs/stable/generated/torch.jit.wait.html>

Description:

Force completion of a `torch.jit.Future[T]` asynchronous task, returning the result of the task. See `fork()` for docs and examples. :param future: an asynchronous task reference, created through `torch.jit.fork` :type future: `torch.jit.Future[T]` the return value of the completed task

Function Signature

```
torch.jit.wait(future)[source]#
```

Returns

Return type

Returns:

T

Detailed Documentation

Documentation

Force completion of a `torch.jit.Future[T]` asynchronous task, returning the result of the task.

See `fork()` for docs and examples. :param future: an asynchronous task reference, created through `torch.jit.fork` :type future: `torch.jit.Future[T]`

the return value of the completed task

Force completion of a `torch.jit.Future[T]` asynchronous task, returning the result of the task.

See `fork()` for docs and examples. :param future: an asynchronous task reference, created through `torch.jit.fork` :type future: `torch.jit.Future[T]`

the return value of the completed task
