

torch.nn.attention.bias.causal_lower_right

https://pytorch.org/docs/stable/generated/torch.nn.attention.bias.causal_lower_right.html

Description:

Creates a lower-right triangular causal bias. This function generates a lower-right triangular matrix to represent causal attention bias with a diagonal offset set so that the inclusive values are aligned to the lower right corner of the matrix. The equivalent pytorch code for constructing this bias is: For instance, with shape=(3,4), the materialized bias tensor will be: size – The size of the bias matrix.

Function Signature

```
torch.nn.attention.bias.causal_lower_right(*size)[source]#
```

Parameters

Returns

Return type

Returns:

CausalBias

Code Examples

```
diagonal_offset = size[1] - size[0]
torch.tril(
    torch.ones(size, dtype=torch.bool),
    diagonal=diagonal_offset,
)
```

```
[[1, 1, 0, 0],
 [1, 1, 1, 0],
 [1, 1, 1, 1]]
```

Detailed Documentation

Documentation

Creates a lower-right triangular causal bias.

This function generates a lower-right triangular matrix to represent causal attention bias with a diagonal offset set so that the inclusive values are aligned to the lower right corner of the matrix.

The equivalent pytorch code for constructing this bias is:

For instance, with shape=(3,4), the materialized bias tensor will be:

size – The size of the bias matrix.

The LOWER_RIGHT triangular causal bias variant.

Creates a lower-right triangular causal bias.

This function generates a lower-right triangular matrix to represent causal attention bias with a diagonal offset set so that the inclusive values are aligned to the lower right corner of the matrix.

The equivalent pytorch code for constructing this bias is:

For instance, with shape=(3,4), the materialized bias tensor will be:

size – The size of the bias matrix.

The LOWER_RIGHT triangular causal bias variant.
