

torch.nn.functional.adaptive_max_pool1d

https://pytorch.org/docs/stable/generated/torch.nn.functional.adaptive_max_pool1d.html

Description:

Applies a 1D adaptive max pooling over an input signal composed of several input planes. See `AdaptiveMaxPool1d` for details and output shape. `output_size` – the target output size (single integer) `return_indices` – whether to return pooling indices. Default: False

Function Signature

```
torch.nn.functional.adaptive_max_pool1d(input, output_size,
return_indices=False)[source]#
```

Parameters

Detailed Documentation

Documentation

Applies a 1D adaptive max pooling over an input signal composed of several input planes.

See `AdaptiveMaxPool1d` for details and output shape.

`output_size` – the target output size (single integer)

`return_indices` – whether to return pooling indices. Default: `False`

Applies a 1D adaptive max pooling over an input signal composed of several input planes.
