

torch.nn.functional.adaptive_max_pool2d

https://pytorch.org/docs/stable/generated/torch.nn.functional.adaptive_max_p

Description:

Applies a 2D adaptive max pooling over an input signal composed of several input planes. See `AdaptiveMaxPool2d` for details and output shape. `output_size` – the target output size (single integer or double-integer tuple) `return_indices` – whether to return pooling indices. Default: `False`

Function Signature

```
torch.nn.functional.adaptive_max_pool2d(input, output_size,  
return_indices=False)[source]#
```

Parameters

Detailed Documentation

Documentation

Applies a 2D adaptive max pooling over an input signal composed of several input planes.

See `AdaptiveMaxPool2d` for details and output shape.

`output_size` – the target output size (single integer or double-integer tuple)

`return_indices` – whether to return pooling indices. Default: `False`

Applies a 2D adaptive max pooling over an input signal composed of several input planes.
