

# torch.nn.functional.celu#

<https://pytorch.org/docs/stable/generated/torch.nn.functional.celu.html>

## Description:

Applies element-wise,  $\text{CELU}(x) = \max(0, x) + \min(0, \alpha * (\exp(x/\alpha) - 1))$   
 $\text{CELU}(x) = \max(0, x) + \min(0, \alpha * (\exp(x/\alpha) - 1))$   
 $\text{CELU}(x) = \max(0, x) + \min(0, \alpha * (\exp(x/\alpha) - 1))$ . See CELU for more details.

## Function Signature

```
torch.nn.functional.celu(input, alpha=1., inplace=False) → Tensor[source]#
```

Return type

## Returns:

Tensor

# Detailed Documentation

---

## Documentation

Applies element-wise,  $\text{CELU}(x) = \max(0, x) + \min(0, \alpha * (\exp(x/\alpha) - 1))$   
 $\text{CELU}(x) = \max(0, x) + \min(0, \alpha * (\exp(x/\alpha) - 1))$

See CELU for more details.

Applies element-wise,  $\text{CELU}(x) = \max(0, x) + \min(0, \alpha * (\exp(x/\alpha) - 1))$   
 $\text{CELU}(x) = \max(0, x) + \min(0, \alpha * (\exp(x/\alpha) - 1))$

See CELU for more details.
