

torch.nn.functional.fold#

<https://pytorch.org/docs/stable/generated/torch.nn.functional.fold.html>

Description:

Combine an array of sliding local blocks into a large containing tensor. Currently, only unbatched (3D) or batched (4D) image-like output tensors are supported. See torch.nn.Fold for details

Function Signature

```
torch.nn.functional.fold(input, output_size, kernel_size,  
dilation=1, padding=0, stride=1)[source]#
```

Return type

Returns:

Tensor

Notes & Warnings

WARNING

Warning Currently, only unbatched (3D) or batched (4D) image-like output tensors are supported.

Detailed Documentation

Documentation

Combine an array of sliding local blocks into a large containing tensor.

Currently, only unbatched (3D) or batched (4D) image-like output tensors are supported.

See `torch.nn.Fold` for details

Combine an array of sliding local blocks into a large containing tensor.
