

torch.nn.functional.gelu#

<https://pytorch.org/docs/stable/generated/torch.nn.functional.gelu.html>

Description:

When the approximate argument is 'none', it applies element-wise the function $\text{GELU}(x) = x * \Phi(x)$ where $\Phi(x)$ is the Cumulative Distribution Function for Gaussian Distribution. When the approximate argument is 'tanh', Gelu is estimated with See Gaussian Error Linear Units (GELUs).

Function Signature

```
torch.nn.functional.gelu(input, approximate='none') →  
Tensor#
```

Detailed Documentation

Documentation

When the approximate argument is 'none', it applies element-wise the function $\text{GELU}(x) = x * \Phi(x)$

where $\Phi(x)$ is the Cumulative Distribution Function for Gaussian Distribution.

When the approximate argument is 'tanh', Gelu is estimated with

See Gaussian Error Linear Units (GELUs).

When the approximate argument is 'none', it applies element-wise the function $\text{GELU}(x) = x * \Phi(x)$

where $\Phi(x)$ is the Cumulative Distribution Function for Gaussian Distribution.

When the approximate argument is 'tanh', Gelu is estimated with

See Gaussian Error Linear Units (GELUs).
