

torch.nn.functional.logsigmoid#

<https://pytorch.org/docs/stable/generated/torch.nn.functional.logsigmoid.html>

Description:

Applies element-wise $\text{LogSigmoid}(x_i) = \log(1 + \exp(-x_i))$.
$$(x_i) = -\log \left(\frac{1}{1 + \exp(-x_i)} \right)$$
$$\text{LogSigmoid}(x_i) = \log(1 + \exp(-x_i))$$

See `LogSigmoid` for more details.

Function Signature

```
torch.nn.functional.logsigmoid(input) → Tensor#
```

Detailed Documentation

Documentation

Applies element-wise $\text{LogSigmoid}(x_i) = \log(1 + \exp(-x_i))$ $\text{LogSigmoid}(x_i) = \log\left(\frac{1}{1 + \exp(-x_i)}\right)$

See `LogSigmoid` for more details.

Applies element-wise $\text{LogSigmoid}(x_i) = \log(1 + \exp(-x_i))$ $\text{LogSigmoid}(x_i) = \log\left(\frac{1}{1 + \exp(-x_i)}\right)$

See `LogSigmoid` for more details.
