

torch.nn.functional.lp_pool1d#

https://pytorch.org/docs/stable/generated/torch.nn.functional.lp_pool1d.html

Description:

Apply a 1D power-average pooling over an input signal composed of several input planes. If the sum of all inputs to the power of p is zero, the gradient is set to zero as well. See `LPPool1d` for details.

Function Signature

```
torch.nn.functional.lp_pool1d(input, norm_type, kernel_size,  
stride=None, ceil_mode=False)[source]#
```

Return type

Returns:

Tensor

Detailed Documentation

Documentation

Apply a 1D power-average pooling over an input signal composed of several input planes.

If the sum of all inputs to the power of p is zero, the gradient is set to zero as well.

See `LPPool1d` for details.

Apply a 1D power-average pooling over an input signal composed of several input planes.

If the sum of all inputs to the power of p is zero, the gradient is set to zero as well.

See `LPPool1d` for details.
