

torch.nn.functional.lp_pool2d#

https://pytorch.org/docs/stable/generated/torch.nn.functional.lp_pool2d.html

Description:

Apply a 2D power-average pooling over an input signal composed of several input planes. If the sum of all inputs to the power of p is zero, the gradient is set to zero as well. See LPPool2d for details.

Function Signature

```
torch.nn.functional.lp_pool2d(input, norm_type, kernel_size,  
stride=None, ceil_mode=False)[source]#
```

Return type

Returns:

Tensor

Detailed Documentation

Documentation

Apply a 2D power-average pooling over an input signal composed of several input planes.

If the sum of all inputs to the power of p is zero, the gradient is set to zero as well.

See `LPPool2d` for details.

Apply a 2D power-average pooling over an input signal composed of several input planes.

If the sum of all inputs to the power of p is zero, the gradient is set to zero as well.

See `LPPool2d` for details.
