

torch.nn.functional.margin_ranking_loss

https://pytorch.org/docs/stable/generated/torch.nn.functional.margin_ranking_loss.html

Description:

Compute the margin ranking loss. See MarginRankingLoss for details.

input1 (Tensor) – Predicted values. input2 (Tensor) – Predicted values.

target (Tensor) – Ground truth values.

Function Signature

```
torch.nn.functional.margin_ranking_loss(input1, input2,
target, margin=0, size_average=None, reduce=None,
reduction='mean')[source]#
```

Parameters

Returns

Return type

Returns:

Tensor

Detailed Documentation

Documentation

Compute the margin ranking loss.

See `MarginRankingLoss` for details.

`input1` (Tensor) – Predicted values.

`input2` (Tensor) – Predicted values.

`target` (Tensor) – Ground truth values.

`size_average` (bool, optional) – Deprecated (see reduction).

`reduce` (bool, optional) – Deprecated (see reduction).

`reduction` (str, optional) – Specifies the reduction to apply to the output: ‘none’ | ‘mean’ | ‘sum’. ‘mean’: the mean of the output is taken. ‘sum’: the output will be summed. ‘none’: no reduction will be applied. Default: ‘mean’.
