

torch.nn.functional.multilabel_margin_loss

https://pytorch.org/docs/stable/generated/torch.nn.functional.multilabel_margin_loss.html

Description:

Compute the multilabel margin loss. See `MultiLabelMarginLoss` for details. `input` (Tensor) – Predicted values. `target` (Tensor) – Ground truth values. `size_average` (bool, optional) – Deprecated (see `reduction`).

Function Signature

```
torch.nn.functional.multilabel_margin_loss(input, target,
size_average=None, reduce=None, reduction='mean')[source]#
```

Parameters

Returns

Return type

Returns:

Tensor

Detailed Documentation

Documentation

Compute the multilabel margin loss.

See `MultiLabelMarginLoss` for details.

`input` (Tensor) – Predicted values.

`target` (Tensor) – Ground truth values.

`size_average` (bool, optional) – Deprecated (see reduction).

`reduce` (bool, optional) – Deprecated (see reduction).

`reduction` (str, optional) – Specifies the reduction to apply to the output: ‘none’ | ‘mean’ | ‘sum’. ‘mean’: the mean of the output is taken. ‘sum’: the output will be summed. ‘none’: no reduction will be applied. Default: ‘mean’.

Mutilabel margin loss.
