

torch.nn.functional.tanh#

<https://pytorch.org/docs/stable/generated/torch.nn.functional.tanh.html>

Description:

Applies $\tanh$ element-wise, $\text{Tanh}(x) = \tanh(x) = \frac{\exp(x) - \exp(-x)}{\exp(x) + \exp(-x)}$. See [Tanh](#) for more details.

Function Signature

```
torch.nn.functional.tanh(input) → Tensor[source]#
```

Detailed Documentation

Documentation

Applies element-wise, $\text{Tanh}(x) = \tanh(x) = \frac{\exp(x) - \exp(-x)}{\exp(x) + \exp(-x)}$

$\text{Tanh}(x) = \frac{\exp(x) - \exp(-x)}{\exp(x) + \exp(-x)}$

See Tanh for more details.
