

torch.nn.functional.triplet_margin_loss#

https://pytorch.org/docs/stable/generated/torch.nn.functional.triplet_margin_loss

Description:

Compute the triplet loss between given input tensors and a margin greater than 0. See TripletMarginLoss for details.

Function Signature

```
torch.nn.functional.triplet_margin_loss(anchor, positive,
negative, margin=1.0, p=2, eps=1e-06, swap=False,
size_average=None, reduce=None, reduction='mean')[source]#
```

Return type

Returns:

Tensor

Detailed Documentation

Documentation

Compute the triplet loss between given input tensors and a margin greater than 0.

See `TripletMarginLoss` for details.

Compute the triplet loss between given input tensors and a margin greater than 0.

See `TripletMarginLoss` for details.
