

torch.nn.modules.module.register_module

https://pytorch.org/docs/stable/generated/torch.nn.modules.module.register_m

Description:

Register a backward hook common to all the modules. This function is deprecated in favor of `torch.nn.modules.module.register_module_full_backward_hook()` and the behavior of this function will change in future versions. a handle that can be used to remove the added hook by calling `handle.remove()` `torch.utils.hooks.RemovableHandle`

Function Signature

```
torch.nn.modules.module.register_module_backward_hook(hook)
[source]#
```

Returns

Return type

Returns:

`torch.utils.hooks.RemovableHandle`

Detailed Documentation

Documentation

Register a backward hook common to all the modules.

This function is deprecated in favor of `torch.nn.modules.module.register_module_full_backward_hook()` and the behavior of this function will change in future versions.

a handle that can be used to remove the added hook by calling `handle.remove()`

`torch.utils.hooks.RemovableHandle`

Register a backward hook common to all the modules.

This function is deprecated in favor of `torch.nn.modules.module.register_module_full_backward_hook()` and the behavior of this function will change in future versions.

a handle that can be used to remove the added hook by calling `handle.remove()`

`torch.utils.hooks.RemovableHandle`
