

torch.nn.utils.convert_parameters.parameters_to_vector

https://pytorch.org/docs/stable/generated/torch.nn.utils.convert_parameters.parameters_to_vector.html

Description:

Flatten an iterable of parameters into a single vector. parameters (Iterable[Tensor]) – an iterable of Tensors that are the parameters of a model. The parameters represented by a single vector

Function Signature

```
torch.nn.utils.convert_parameters.parameters_to_vector(parameters)[source]#
```

Parameters

Returns

Return type

Returns:

Tensor

Detailed Documentation

Documentation

Flatten an iterable of parameters into a single vector.

`parameters` (`Iterable[Tensor]`) – an iterable of Tensors that are the parameters of a model.

The parameters represented by a single vector

Flatten an iterable of parameters into a single vector.

`parameters` (`Iterable[Tensor]`) – an iterable of Tensors that are the parameters of a model.

The parameters represented by a single vector
