

torch.nn.utils.parametrize.transfer_param

https://pytorch.org/docs/stable/generated/torch.nn.utils.parametrize.transfer_param.html

Description:

Transfer parametrizations and the parameters they parametrize from `from_module` to `to_module`. If `tensor_name` is specified, only transfers the specified parameter, otherwise transfers all parametrized parameters. If those parameters do not exist in `to_module`, it will create them. Does nothing if `from_module` is not parametrized. `from_module` (`nn.Module`) – module to transfer from `to_module` (`nn.Module`) – module to transfer to `tensor_name` (str, optional) – parameter to transfer

Function Signature

```
torch.nn.utils.parametrize.transfer_parametrizations_and_params(from_module, to_module, tensor_name=None)[source]#
```
