

torch.nn.utils.parametrize.type_before_p

https://pytorch.org/docs/stable/generated/torch.nn.utils.parametrize.type_be

Description:

Return the module type before parametrizations were applied and if not, then it returns the module type. module (nn.Module) – module to get type of

Function Signature

```
torch.nn.utils.parametrize.type_before_parametrizations(modu  
le)[source]#
```

Parameters

Return type

Returns:

type

Detailed Documentation

Documentation

Return the module type before parametrizations were applied and if not, then it returns the module type.

module (nn.Module) – module to get type of

Return the module type before parametrizations were applied and if not, then it returns the module type.

module (nn.Module) – module to get type of
