

torch.nn.utils.remove_spectral_norm#

https://pytorch.org/docs/stable/generated/torch.nn.utils.remove_spectral_norm.html

Description:

Remove the spectral normalization reparameterization from a module.

module (Module) – containing module name (str, optional) – name of weight parameter

Function Signature

```
torch.nn.utils.remove_spectral_norm(module, name='weight')  
[source]#
```

Parameters

Return type

Returns:

T_module

Code Examples

```
>>> m = spectral_norm(nn.Linear(40, 10))
>>> remove_spectral_norm(m)
```

Detailed Documentation

Documentation

Remove the spectral normalization reparameterization from a module.

module (Module) – containing module

name (str, optional) – name of weight parameter

Remove the spectral normalization reparameterization from a module.

module (Module) – containing module

module (Module) – containing module

name (str, optional) – name of weight parameter
