

torch.nn.utils.remove_weight_norm#

https://pytorch.org/docs/stable/generated/torch.nn.utils.remove_weight_norm.

Description:

Remove the weight normalization reparameterization from a module.
module (Module) – containing module name (str, optional) – name of weight parameter

Function Signature

```
torch.nn.utils.remove_weight_norm(module, name='weight')  
[source]#
```

Parameters

Return type

Returns:

T_module

Code Examples

```
>>> m = weight_norm(nn.Linear(20, 40))
>>> remove_weight_norm(m)
```

Detailed Documentation

Documentation

Remove the weight normalization reparameterization from a module.

module (Module) – containing module

name (str, optional) – name of weight parameter

Remove the weight normalization reparameterization from a module.

module (Module) – containing module

module (Module) – containing module

name (str, optional) – name of weight parameter

name (str, optional) – name of weight parameter
