

torch.nn.utils.rnn.invert_permutation#

https://pytorch.org/docs/stable/generated/torch.nn.utils.rnn.invert_permutation.html

Description:

Returns the inverse of permutation. This is useful for converting between sorted and unsorted indices in a PackedSequence. permutation (Tensor, optional) – a 1-D tensor of indices to invert

Function Signature

```
torch.nn.utils.rnn.invert_permutation(permutation)[source]#
```

Parameters

Return type

Returns:

Optional[Tensor]

Detailed Documentation

Documentation

Returns the inverse of permutation.

This is useful for converting between sorted and unsorted indices in a `PackedSequence`.

`permutation` (Tensor, optional) – a 1-D tensor of indices to invert

Returns the inverse of permutation.

This is useful for converting between sorted and unsorted indices in a `PackedSequence`.

`permutation` (Tensor, optional) – a 1-D tensor of indices to invert
