

torch.optim.Optimizer.add_param_group

https://pytorch.org/docs/stable/generated/torch.optim.Optimizer.add_param_group.html

Description:

Add a param group to the Optimizer's param_groups. This can be useful when fine tuning a pre-trained network as frozen layers can be made trainable and added to the Optimizer as training progresses.

param_group (dict) – Specifies what Tensors should be optimized along with group specific optimization options.

Function Signature

```
Optimizer.add_param_group(param_group)[source]#
```

Parameters

Detailed Documentation

Documentation

Add a param group to the Optimizer s param_groups.

This can be useful when fine tuning a pre-trained network as frozen layers can be made trainable and added to the Optimizer as training progresses.

param_group (dict) – Specifies what Tensors should be optimized along with group specific optimization options.

Add a param group to the Optimizer s param_groups.

This can be useful when fine tuning a pre-trained network as frozen layers can be made trainable and added to the Optimizer as training progresses.

param_group (dict) – Specifies what Tensors should be optimized along with group specific optimization options.
